- Microsoft Word Accessibility Checker

### Nu HTML Results

1. Home.htm: PASS
2. Adults.htm: PASS
3. Childrens.htm: PASS
4. Contact.htm: PASS

### WAVE Results

1. Home.htm: PASS
2. Adults.htm: PASS
3. Children.htm: PASS
4. Contact.htm: PASS

## ANDI and NVDA Results

I went through each page and the testing protocol using ANDI and NVDA. One issue I found was in the footer search bar with no ANDI output. There is an aria-label but still coming up with no output which I admittedly am confused about. ANDI and the CCA helped me with my coloring and images. I was able to replace an inaccessible image on the home page that I initially thought was okay but was not. The background image passed with no issues.
