

WCAG Standards at a Glance

Updated July 2024

Perceivable

- **Clarity:** Make it easier for users to see and hear content including color contrast separating foreground from background and visual clutter.
- **Adaptability:** Create content that can be presented in different ways (for example simpler layout) without losing information or structure.
- **Text Alternatives:** Provide text alternatives for any non-text content so that it can be changed into other forms people need, such as large print, braille, speech, symbols or simpler language.
- **Video Alternatives:** Provide video and audio alternatives, such as closed captions and audio descriptions.

Operable

- **Keyboard Accessible:** Make all functionality available from a keyboard.
- **Time:** Provide users enough time to read and use content.
- **Navigation:** Provide multiple ways to help users navigate, find content, and determine where they are.
- **Seizure Safety:** Do not design content in a way that is known to cause seizures for people with photosensitive epilepsy.

Understandable

- **Readable:** Make text content readable and understandable.
- **Input Assistance:** Help users avoid and correct mistakes.
- **Predictable:** Make Web pages appear and operate in predictable ways.

Robust

- **Compatible:** Maximize compatibility with current and future user agents, including assistive technologies.
